David H. Murdock Research Institute

Ag-Bio Solutions
Accelerate Your Research

The David H. Murdock Research Institute enhances agricultural research by improving plant health and ensuring nutritious food production.

SUPPORTING YOUR RESEARCH

The DHMRI uses its research capabilities to provide agricultural biotechnology solutions to industry, government, and academic collaborators. By taking a multidisciplinary approach, the DHMRI improves crop protection, crop yield, and the quality of nutritional food.

BREADTH OF CAPABILITIES

As the demand for healthier food products increases, DHMRI leverages complex analytical tools from different scientific disciplines to improve the taste and nutritional value of various crop breeds.

Research Support

- Protein & Metabolite Biochemistry
- Cell Biology
- Genomics
- Clinical Chemistry

WHO WE ARE

The David H. Murdock Research Institute (DHMRI) is a scientific research institute located at the North Carolina Research Campus. Dedicated to the improvement of human life, DHMRI provides customized solutions with a multidisciplinary, systems biology approach in the areas of human health, nutrition, and agriculture.
